soft play™

**Let all kids
play in perfect
harmony.**

The Concerto line of musical equipment allows children of all abilities to experience the joy and benefits of making music. Designed at a more accessible angle and height, these instruments can be played comfortably by all kids, including those with mobility devices.

Chimes

Ring in the fun with the Concerto Chimes. Eight aluminum chime tubes are tuned to the traditional music scale. These large diameter tubes produce a deep, powerful, and resonant tone you can hear and feel. The harder you strike with the attached rubber mallets, the louder and longer the Chimes will sound. A concave frame invites musicians of all abilities to play along.

Cabasas

Shake, rattle, and roll! A cross between maracas and traditional cabasas, this musical product makes a metallic rattling sound when spun and changes as you move the drum back and forth. Angled forward, the Cabasas enable people of all abilities to engage in the rhythm.

Vibes

Send out good vibrations with the Concerto Vibes. Fourteen colorful chime bars are tuned on the traditional seven-note scale, creating accurate musical tones and enabling you to perform real songs. When struck with the attached rubber mallets, the Vibes give off a full, sustained note. An angled design allows all children to join in on the music making.

Congas

Set the rhythm in motion with Concerto Congas! Just like real congas, the sound will vary depending on where you strike the drum head and have little reverberation. The drums are set at an angle that lets people of all abilities keep the beat.
