

Parents are always looking for fun and imaginative ways for their little ones to play, discover and grow. SPROUTS were designed especially for toddlers. These free form, colorful shapes encourage active play while stimulating a child's imagination. SPROUTS promise an interactive and memorable experience for both children and their parents. Here we grow!

SPROUTS provide a focal point of play. The six inventive shapes with bright and fun colors stimulate a toddler's mind and body while offering a fun environment for parents and caregivers to interact and watch.

Node

This playful amorphous shape stands 30" tall and encourages discovery through the mirror and bead panels central to each unit. Deluxe panels include lights and simple sounds that are activated through a child's movement. Watch as they play and discover the many facets of the Node.

Did

know?

SPROUTS' innovative and durable design offers texture and technology with tactile surfaces, electronic lights and sounds to create an interactive and open play experience for children 3 years and younger.

Loop

This elliptical form has a smooth opening for easy crawl-through play, promoting balance, coordination and curiosity. Connect several loops for additional challenge and fun while adding bright and interesting colors to liven up your play space. Are you a motorcycle racer jumping through the loops?

Bean

This jelly-bean inspired shape offers the most play opportunity of all the SPROUTS. Tots can crawl on, over and under the Bean while testing their balance and climbing skills. Pretend you are a rabbit in a hole, climb out and hop over your friends!

Step Pod

This stepping-stone-like form is placed in linear groups and can be stacked two-high to create a low-to-high profile that encourages balance and spatial association. Children can pretend to be mountain climbers or imagine they are crossing a rocky river with these cool shapes and profiles.

Did

know?

SPROUTS meet the fall zone and ASTM #2373 standards for toddlers along with providing ADA access reducing size consumption when space and safety are an issue in contained play environments.

Spin Cup

It's always fun to spin. This low-to-the-ground cup-shaped form spins 360°. Kids can sit, spin and discover by themselves or with a friend for cooperative play, adding a whole new activity to SPROUTS.

Did

Design your own SPROUTS zone by selecting and connecting activities that work for your space to create the most active play and discovery.

SPROUTS, Play. Discover. Grow.

Contained Play Environment

SPROUTS provide a fun and active experience for toddlers in both open and contained play environments. Choose the layout that works best for your space, and SPROUTS securely anchor to the floor, creating a pathway to many learning and play activities for little ones.

Open Play Environment

The hands-on experiences offered by SPROUTS' colorful shapes and textures provide endless play opportunities. Create your own configuration and activate imaginations, encourage discovery and provide the perfect interactive spot for tots.

Features	Benefits
Designed to accommodate any play setting and space.	For outdoors, indoors as a separate open zone or integrated into a contained play structure as a separate space-efficient toddler zone.
Scaled for toddlers' smaller size. Meets fall zone and ASTM #2373 requirements.	Provides activities specially designed for younger children and conforms to requirements for children 23 months and younger.
Colorful and playful freeform shapes.	Stimulates the child's imagination and challenges their physical development.
When contained, SPROUTS are ADA accessible.	Reduced floor use for space efficiency.
Soft & highly durable design and materials.	Cushioning creates a great place for toddlers to waddle and crawl.
Streamlined and innovative design.	Creates a focal point for play while offering line of sight for parents/caregivers.
